

OISE Newbury Study Hall Report - IELTS Preparation

The student has demonstrated exceptional dedication to her studies, actively participating in all sessions while maintaining focus on her goal of achieving a band 7 or higher for university admission.

Her in-class test results have varied somewhat between band 5 and band 7, suggesting that if she is particularly fortunate with the topics arising in her exam, she may achieve a band 7 at her most immediate sitting; however, we would perhaps not expect it quite yet.

She is evidently capable of achieving her desired band 7 in the not-too-distant future with further preparation.

Overall Progress

The student has shown consistent dedication to her IELTS preparation, maintaining high levels of engagement and frequently requesting additional practice materials.

Her current performance indicates she is progressing well toward her target of band 7, with particular strengths in speaking and academic discussion.

Areas for continued focus include reading comprehension and expanding her academic vocabulary range.

Recommendations

1. Continue with additional reading practice to improve comprehension scores
2. Maintain focus on expanding academic vocabulary
3. Further practice with listening exercises, particularly note-completion tasks
4. Continue developing writing skills through analysis of high-scoring essays
